ER9- Custom Musician Earplugs

Custom Musician Earplugs have 3 choices of interchangeable filters. ER9, ER15 or ER25.

The filters come in the standard style, partially countersunk or completely countersunk. When using our Musician's earplugs sound quality is clearer and more natural and fatigue associated with noise exposure is reduced. The world doesn't sound muffled.

Musician earplugs are also great for those who are exposed to 90-120dB sound levels for various time periods and need to hear accurately such as:

Dentists, Pilots and airline personnel who do not require maximum attenuation, recording engineers, sound crews, most industrial workers, machinists, restaurant and dance club employees and rock music listeners.
